# Streams Signature Insertion & Verification Application
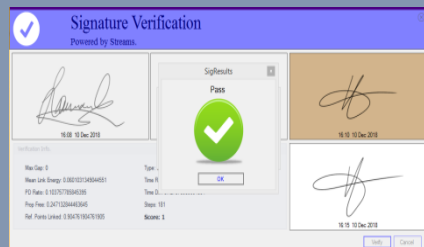

## MAIN FEATURES

Secure Access

Save Signature Models

Compare and Validate Signatures

Sign & Merge

Customize Specific Customers Applications and workflows

SIGN INSERT

Streams Sign Insert is an application to capture the handwritten signature electronically and add it to a PDF document on Desktop or network environments. By using Sign Insert, you can sign the document electronically without the need to print and sign on paper. After the document has been signed a new PDF will be created for further usage (storage, email, …)

SIGN INSERT for WINDOWS

Simple eSignature software for Windows

Sign Insert PDF for Windows is a standalone simple electronic signature software, which allows you to sign your PDF document electronically and share it, without the process of printing, signing and scanning the document. It is also an ideal solution for form input, free-hand annotations, and a post-it on your PDF.

Users can sign documents using a Wacom signature pad, which enables your customers or clients to sign their names just like they would on paper, you can also save the document for record keeping or distribution. The document is Adobe Acrobat compatible, so it can be viewed by any PDF viewer.

If you acquire the Pro version, you will be able to save multiple signatures forms accompanied with its unique identifier. After which presented signature will be compared and validated and accordingly actions will be taken.

System Requirements

- PC: Windows 7 or later
- Wacom signature pad (STU and DTU series)

Streams for Technology Services has its own development capabilities to customize the Sign Insert application to cope with the specific requirements of its clients. For further information please contact us on info@streams.com.eg
